Heritage College Technology Graduates Receive Provincial Bursaries

Eight 2005 graduates of two technology programs at Heritage College recently received individual bursaries from the Quebec Ministry of Education, Recreation and Sports through a project aimed at encouraging graduates of Information and Communication technology programs throughout the province.

Awarded \$3,000 each were Electronics Technology (Computers/Telecommunications) graduates Daniel Paulin and Abdolrahman Saadi. Also recipients of individual \$3,000 awards were Computer Science (Co-op Option) graduates Yan Brascoupe, Michel Gauvin, Fu Dong Ma, Prosper Nsengiyuma, Kordestan Saadi and Raymond Vilon.

West Quebec's only English cégep, Heritage College offers many dynamic career and pre-university programs leading to diplomas and/or attestations of college studies. Electronics Technology (Computers/Telecommunications) and Computer Science (Co-op Option) are three-year career programs. Electronics Technology graduates are well qualified for careers in government or business in such fields as computers, telecommunications, biotech or manufacturing. They can choose also to continue their studies at university in electronic engineering, computer science, business administration or industrial design. Computer Science graduates are well prepared for careers as programmers/analysts, web developers/designers, database administrators, network administrators, software developers, quality assurance professionals, and user support or technical support specialists.
